

DISCLAIMER

PLEASE READ BEFORE USING THIS GUIDE

The information provided in this guide is for educational and informational purposes only and is not intended as medical advice.

Your safety is your responsibility.

IMPORTANT INFORMATION

Your Safety Comes First

Always prioritize hygiene, use sterile equipment, follow proper protocols, and listen to your body. If you experience any adverse effects, discontinue use and seek professional medical attention.

- ♥ This guide is not a substitute for professional medical advice, diagnosis, or treatment.
- ♥ Always do your own research and consult with a qualified healthcare professional before starting any new treatment, especially if you have a medical condition, are pregnant, nursing, or taking medication.
- ♥ The techniques and recommendations in this guide are based on personal experience and research. Results can vary from person to person.
- ♥ You are **solely responsible** for your own decisions, actions, and results.
- ♥ The author and creator of this guide are not licensed medical professionals. All content is shared in good faith.
- ♥ This guide does not provide medical, legal, or professional advice of any kind. **Use at your own risk.**

DO YOUR OWN RESEARCH

Stay informed, ask questions, and educate yourself before trying any treatment.

HYGIENE IS EVERYTHING

Always use sterile equipment and clean products to reduce the risk of infection.

KNOW YOUR CONTRAINDICATIONS

Do not use if you have any conditions that could be worsened by the treatment.

START SLOW AND LISTEN

Everyone's skin is different. Start with less, observe how your skin responds, and adjust.

YOU ARE IN CONTROL

You know your body best. Always make empowered, informed decisions.

♥ LEGAL DISCLAIMER ♥

By using this guide, you acknowledge and agree that the author, creator, and any affiliated parties are not liable for any injury, harm, loss, or adverse reaction that may occur as a result of using the information provided. You agree to take full responsibility for your own health, safety, and results.

This guide is here to empower you with knowledge,
but you are the expert of your own journey.

Thank you ♥

for being part of this journey and for prioritizing your confidence and well-being.

LEARN ♥ UNDERSTAND ♥ REFERENCE

♥ NOT MEDICAL ADVICE – EDUCATIONAL PURPOSES ONLY ♥

ALWAYS FOLLOW THE PRESCRIBING INFORMATION PROVIDED BY YOUR HEALTHCARE PROFESSIONAL.

♥ WHAT IS BOTULINUM TOXIN? ♥

- ♥ Botulinum toxin (often called “tox”) is a purified protein that temporarily relaxes targeted muscles, reducing the appearance of fine lines and wrinkles.
- ♥ It works by blocking nerve signals to the muscles, allowing them to relax.
- ♥ Results are temporary, typically lasting several months, and treatments can be repeated as needed.
- ♥ Cosmetic uses include softening expression lines for a smoother, refreshed look.

♥ WHAT IS RECONSTITUTION? ♥

Reconstitution means adding sterile solution to the freeze-dried botulinum toxin powder in the vial to create a working solution. This must be done in a sterile fashion by a qualified healthcare professional, following the manufacturer’s labeling and clinical guidelines.

2.5:1 AND 1:1 DILUTION RATIOS

♥ These are two common reconstitution concentrations used by practitioners. ♥

♥ 2.5:1 DILUTION ♥

- ♥ A 2.5:1 dilution means 2.5 mL of sterile solution is added to the vial.
- ♥ This creates a less concentrated solution.
- ♥ Often used for a slightly larger fluid volume and broader treatment areas.

♥ 1:1 DILUTION ♥

- ♥ A 1:1 dilution means 1 mL of sterile solution is added to the vial.
- ♥ This creates a more concentrated solution.
- ♥ Often used for smaller, more precise dosing and for areas that require less volume.

♥ WHY IT MATTERS ♥

- ♥ The dilution (concentration) affects how much solution contains a given number of units.
- ♥ Different concentrations may be chosen based on the treatment area, technique, and practitioner preference.
- ♥ Always reference the manufacturer’s guidelines and your provider’s recommendations.

♥ COMMON TERMS ♥

- ♥ **Units (U):** The measurement of botulinum toxin.
- ♥ **Vial:** The container holding the freeze-dried toxin.
- ♥ **Sterile solution:** Typically preservative-free saline.
- ♥ **Dilution ratio:** The amount of solution added to the vial (e.g., 2.5:1 or 1:1).
- ♥ **Working solution:** The prepared, ready-to-use solution after reconstitution.

LEARN ♥ UNDERSTAND ♥ REFERENCE

♥ NOT MEDICAL ADVICE · EDUCATIONAL PURPOSES ONLY ♥

ALWAYS FOLLOW THE PRESCRIBING INFORMATION PROVIDED BY YOUR HEALTHCARE PROFESSIONAL.

♥ STORAGE GUIDELINES ♥

- ♥ Store unopened vials in the refrigerator (2°C – 8°C / 36°F – 46°F).
- ♥ Protect from light and moisture.
- ♥ Keep vials in their original packaging until use.
- ♥ Always check the manufacturer's specific storage requirements.

♥ SHELF LIFE ♥

Unopened Vial:

Use by the expiration date printed on the label.

After Reconstitution:

Each brand has specific recommendations for how long the reconstituted solution can be safely used.

In the DIY world it is common to keep leftover tox in the fridge for 2 weeks for touchups, then transfer to freezer for next treatment.

♥ SIGNS OF COMPROMISE ♥

Do NOT use if you notice:

- ♥ Discoloration or cloudiness
- ♥ Particles or precipitation
- ♥ Leaking or damaged vial
- ♥ Unusual odor

When in doubt, do not use the product.

♥ BEST PRACTICES FOR RECONSTITUTION ♥

- ♥ Always use a clean, sterile work area.
- ♥ Wash or sanitize hands and wear gloves.
- ♥ Use a new sterile syringe and needle for each vial.
- ♥ Use only preservative-free sterile saline unless otherwise directed by the manufacturer.
- ♥ Label the vial with the date and time of reconstitution.
- ♥ Follow manufacturer instructions exactly for your specific product.

♥ COMMON MISTAKES TO AVOID ♥

- ♥ Using tap water or non-sterile solutions
- ♥ Reusing needles or syringes
- ♥ Mixing different brands of toxin
- ♥ Exceeding the recommended shelf life after reconstitution
- ♥ Storing in the wrong temperatures
- ♥ Ignoring manufacturer instructions

♥ CONTINUING EDUCATION ♥

Botulinum toxin treatments require knowledge, precision, and ongoing education. Stay informed, follow guidelines, and never stop learning to provide the safest outcomes for your clients.

2.5:1 Dilution

With 2.5:1
dilution
EVERY 5 line
marks 2 tox
units.
example the
10 line = 4 tox
units

1:1 Dilution

With 1:1
dilution
EVERY line
starting with
the second
line marks 1
tox unit.
example the
5 line = 5 tox
units

Commonly
used in DAO
and areas that
need less
volume or
spread.
